SCAFFOLDING MADE IN PLETTENBERG

SCAFFOLDINGS MADE IN PLETTENBERG

MJ-Gerüst GmbH, based in Plettenberg in the German region of Sauerland, is part of a strong group of companies, which can look back on more than 50 years of company history. The core competence of the family company lies in the production and worldwide distribution of high-quality steel and aluminum scaffolding systems, which offer almost limitless possibilities in the field of modern system scaffolding construction.

With a unique range of products and a wide range of universal accessories, we offer our customers the option of completing existing scaffolding material in a system-compatible complement. A highly valued advantage by our customers that has given our scaffolding international recognition and prominence.

Development, production and sales. These are the cornerstones of our range of services, which are supplemented by numerous additional services. Especially our support in the planning and implementation of difficult projects is claimed. A service in which our technical know-how and experience can often contribute to considerable time and cost savings.

Only through qualified work can a safe quality product be created. Our proven quality management reflects our knowledge and experience and makes the quality of our products measurable. In order to guarantee our high quality standards, our production processes are constantly accompanied by external examination offices and engineers.

OUR COMPANY - YOUR BENEFITS

- Production in Germany at the location Plettenberg
- System compatible, high quality and norm compliant scaffold systems
- Certifications according to DIN EN 9001, 14001 and 50001
- Highest product quality through dynamic quality management
- Short-term availability of material due to high storage capacities and short decision-making processes
- Use of the modern production technology and permanent optimization of technological production running
- Project support already in the planning phase

Delivery time on request

All prices exclude VAT applicable at the time of shipment. All dimensions and weights are non-binding approximate values. Technical data is subject to change without prior notice. Prices are charged as applicable on the day of shipment. Sale is subject exclusively to our sales terms and delivery conditions. An excerpt: place of business and jurisdiction is Plettenberg. Extended retention of title until full payment of all outstanding claims. Our prices are ex works.

OPTI-ROOF

KEDER ROOF SYSTEM

in lightweight aluminum truss construction

Particularly economical thanks to tool-free assembly. The roof construction elements are assembled without tools using automatically engaging claws and bolts with spring clips. Very time-saving assembly thanks to self-aligning design.

Modular structure for many roof widths in pitched roof and mono-pitched roof form. The elements have very low weights so that manual assembly or pre-assembly on the ground is possible.

The compact dimensions, together with the low weight, ensure optimum transportation options. This minimizes crane costs.

The **OPTI-ROOF** is compatible for bay widths of 2.57 m and is also available for metric applications with a bay width of 2.50 m. Sliding supports are available for the standard scaffolding systems on

the market with the dimensions **CONNECT**, **UNI** and **UNI TOP**. This allows the loads on the scaffolding to be balanced and the inner and outer standards to be fully activated.

A wide range of applications such as

- Construction site weather protection roofs for new construction projects to avoid delay times.
- Weather protection roofs for buildings requiring special protection from the weather, such as museums.
- Protection of existing buildings from the weather.
- Event weather protection roofs

In combination with the **MJ-OPTI-BOARD** system for wall cladding, complete enclosures can be created.

LATTICE BEAM OPTI-ROOF

- Aluminum
- Pipe connector pre-assembled
- Integrated piping rail

The system free safety enclosure OPTI-BOARD is the answer to many questions that you may ask yourself when planning your construction site with regard to environmental and noise protection. When renovating or building a new building, the construction site enclosure protects employees and passers by from noise, dust and dirt.

- Light cassette: The transparent version of the OPTI-BOARD enables work in daylight conditions.
- Dust-tight: A circumferential rubber seal makes the OPTI-BOARD almost dust-tight. This enables a clean construction site cladding, the use of vacuum systems (asbestos removal) and weather-independent sandblasting.
- Quick and easy assembly
- Can be use in the UNI, UNI-CONNECT, UNI TOP, COMBI and OPTIMA systems
- Can be installed vertically and horizontally
