

SCAFFOLDING MADE IN PLETTENBERG

Because we know what matters.

Since the beginning of the 1970s, everything at our company has revolved around scaffolding systems and scaffolding accessories. Or rather, around you, our customer. Your requirements, your project, your satisfaction. We know the business and we know: Time is money. Our claim: You have a problem, we have the right solution. In stock. That's why our team gets straight to work. And ensures uncomplicated and smooth processing.

We give you maximum security and our word. Simply to deliver really good quality made in Plettenberg. Not someday, but now. From our home to the whole world and directly to your project. When you want, as much as you want. We go beyond ourselves for our customers.

This dynamic, that is MJ Gerüst.

UNI-CONNECT

07 Frame scaffold

- Safe standing due to positive and force fit wedge connections
- Scaffold frame with U-profile for flexible mounting of scaffolding decks
- Easier partial dismantling due to optimized claw geometry
- Gap-free console solutions for save and economical use in full heat insulation
- Generally approved by building inspection, also for common, cross-manufacturer use

UNI

Metric frame scaffold

- Assembly without the use of any additional tools due to self-locking tilt pin locking device
- Autonomous perpendicular adjustment through fixed knot connections
- High longitudinal stiffness due to dimensionally stable round bolt support of the system linings
- Complete usability of the working width due to outside diagonal braces
- Generally approved by building inspection, also for common, cross-manufacturer use

UNI TOP

Facade scaffolding

- Assembly without the use of any additional tools due to self-locking tilt pin locking
- Autonomous perpendicular adjustment through fixed knot connections high longitudinal stiffness due to dimensionally stable round bolt support of the system linings
- Reduced frame and deck widths for optimum use of loading space during material transport
- Generally approved by building inspection, also for common, cross-manufacturer use

OPTIMA / TOP / METRIC

Flexible facade scaffolding

- Proven functionality of the modular perforated disc
- Tension-optimized load capacity with simultaneous weight reduction
- Up to 8 connection options per node
- Also ideal for support framing / shoring systems and events
- Generally approved by building inspection, also for common, cross-manufacturer user

COMBI

Modular scaffolding

- Proven functionality of the modular perforated disc
- Tension-optimized load capacity with simultaneous weight reduction
- Up to 8 connection options per node
- Also ideal for shoring systems / support framing and events
- Generally approved by building inspection, also for common, cross-manufacturer use

ACCESSORIES

System-free

- Development of individual special solutions with our in-house welding manufacturer, certified pursuant to DIN EN 1090-2, DIN EN 1090-3 & DIN EN 15085-2
- Various scaffold components, suitable for any extension, from the lowest to the highest scaffolding level
- Extensive range of repair equipment and spare parts, including roof components and bridgings
- Wide range of products for more safety on your construction site, especially for anchoring, storage and transport
- Mobile scaffolds in various designs as well as scaffolding and freight lifts
- Construction site protection by OPTI-BOARD
